

Date - July 9th, 2024 - July 19th, 2024

This was our burndown chart for the sprint. There are some ups during the sprint since we added tasks that we hadn't considered before that fell under different user stories, and some were just to divide tasks into smaller, more concise tasks.

Sprint	Commitment	Completed
REN Sprint 1	0	30
REN Sprint 2	0	15
REN Sprint 3	23	32

I think we were finally able to figure out how to correctly make these charts, since it now shows the commitment at the beginning of the sprint. The final work done was higher than the commitment since we added user stories for tasks we stumbled upon that we hadn't considered before. This sprint was also more productive than the last because we had more time to work on it since we had finished our midterms and didn't have as many assignments for other classes.
